

Invitation to the TransConstellation Seminar

4th March 2008, Solbosch Campus

The Solvay Business School is pleased to host a Seminar aimed at presenting TransConstellation, its members, aims and activities to the Solvay Business School Student community.

Composed of five industry leaders in the field of financial-transaction processing, namely Atos Worldline, Euroclear, Fin-Force, SWIFT and the Bank of New York Mellon (Brussels Office), TransConstellation aims to strengthen and promote Belgium as a centre of excellence in financial-transaction processing. TransConstellation recently unveiled a novel approach for financial-services companies to assess and improve operational risk management, a key area of concern for regulators, particularly during turbulent capital markets.

Led by a prominent guest speaker from the TransConstellation Board and TransConstellation operating risk management experts, this Seminar is designed to give you an understanding of the challenges that financial-transaction processing companies are facing.
