1. PRESENTATION OF CERMi

The Centre for European Research in Microfinance (CERMi) is the leading research centre on microfinance in Europe. Created in 2007, CERMi gathers microfinance scholars from all over Europe and beyond, as well as PhD students from Centre Emile Bernheim (Solvay Brussels School of Economics and Management, Université libre de Bruxelles – ULB) and from the Warocqué Research Centre (Warocqué School of Business and Economics, Université de Mons – UMONS). In 2013, CERMi celebrated its fifth birthday.

Microfinance can be defined as the provision of financial services – such as credit, savings, and insurance – to poor clients that are usually excluded from the traditional banking system. The microfinance sector is now experiencing a strong growth, thus creating a constant need for new knowledge.

Co-directed by Professors Marek Hudon (ULB), Marc Labie (UMONS), and Ariane Szafarz (ULB), CERMi aims to participate to scientific conversations by studying the management of microfinance institutions (NGOs, cooperatives, and commercial firms), based on an interdisciplinary approach. CERMi’s researchers study topics such as governance and risk management in microfinance institutions, innovation in financial products for poor clients, regulations and public policies, including the gender issue, the role of investors, microfinance and the environment, remittances, etc. A special attention is also devoted to ethical issues.

CERMi promotes high-level research in microfinance, in particular by encouraging doctoral research, organising workshops, seminars, and conferences, and developing international partnerships. CERMi has signed partnership agreements with universities and research centres like CEREN, Burgundy School of Business (France), Indian Institute of Management in Ahmedabad (India), French Institute of Pondicherry (India), University of Agder (Norway), Université Paris I-Panthéon-Sorbonne (France), Université Paris-Dauphine (France); as well as with NGOs: ADA, CERISE, COPEME, PlaNet Finance, and SOS Faim.
CERMi also cooperates with universities in the South, such as Université Protestante au Congo (RDC), Université de Kinshasa (RDC), Université de Lubumbashi (RDC), and Université Catholique de Bukavu (RDC). CERMi also carries on expert missions.

CERMi’s mission is to provide academic support to practitioners from the microfinance sector (NGOs, cooperatives, donors, international aid organisations, investment funds, and banking institutions) and offer critical view on microfinance practices. It closely collaborates with the European Microfinance Programme (Master Complémentaire Conjoint en Microfinance), a Master programme taught entirely in English, and organised by three European universities (ULB, UMONS, Université de Paris-Dauphine) and five NGO partners (ADA, BRS, CERISE, PlaNet Finance Belgium, and SOS Faim).

Among the research projects ongoing at CERMi in 2013, let us highlight the following ones:

- **CUD-PIC in the D.R. of Congo**: Since September 2010, CERMi is coordinating the PIC (“Projet Interuniversitaire Ciblé”, or “Targeted Interuniversity Project”) in Congo. The four-year project “Support to training and research in microfinance in the Democratic Republic of Congo” aims to contribute to the economic and social development of Congo by strengthening the microfinance sector as a tool to alleviate poverty. Concretely, CERMi supports training in microfinance in four Congolese universities. Three PhDs theses have been undertaken so far in these universities. Student and researcher mobility is also supported. This project involves 4 Belgian universities (Université de Mons, Université libre de Bruxelles, Université de Liège, and Katholiek Universiteit Leuven) and 4 Congolese universities (Université Protestante au Congo, Université Catholique de Bukavu, Université de Lubumbashi, and Université de Kinshasa).

- CERMi participates to the Interuniversity Attraction Poles (IAP) research project on social entrepreneurship: "If not for Profit, for What? And How? Building Interdisciplinary and Integrated Knowledge on Social Entrepreneurship and Social Enterprise". This project aims to build interdisciplinary and integrated fundamental
knowledge on social enterprises. CERMi is in charge of the “Financing Social Enterprises” Thematic line, including Social Banking and Subsidies of social enterprises. It involves research teams from Université de Liège, Université libre de Bruxelles, Katholieke Universiteit Leuven, and Vrije Universiteit Brussel, and includes international partners from Europe and the U.S. Two PhD students are funded by the IAP project: Luminita Postelnicu and Camille Meyer.

- Since January 2012, CERMi-ULB is part of a 4 year FNRS-FRFC project involving a randomized control trial in Burundi, in collaboration with Profs. Bram De Rock and Philip Verwimp. The project focuses on the impact of microcredit on the consumption of rural households. The grant finances the doctoral fellowship of CERMi researcher Lionel Rama Ngenzebuke as well as a field project.

- CERMi-UMONS is part of a 3-year European Investment Bank (EIB) project on financial inclusion in crisis, in partnership with the University Paris I-Panthéon-Sorbonne/IRD (France), the University of Fribourg (Switzerland) and LASAARE (Morocco)

- The Philippson Foundation has granted CERMi and the Philippson Chair in Managing for Sustainable Human Development (ULB) funding for a full-time 2 + 2 year research fellowship on “Microfinance and Social Entrepreneurship”. This has allowed CERMi researcher Katarzyna Cieślik to undertake a Ph.D. on that topic.

- In 2013, CERMi has obtained funding for the programme “Belgian Research Action through Interdisciplinary Networks” (BRAIN-be) funded by the Federal scientific authority in Belgium (BELSPO). The goal of the “Food4sustainability” project is to identify the requirements for a reform of food systems as part of a transition towards a low-carbon society that would take into account both extrinsic (rewards of economic and financial natures) and intrinsic incentives (pertaining to social standards and to values that are important for the stakeholders). CERMi will work on the financial incentives that may efficiently reduce the impact of food systems on climate changes.
This four-year project involves Professors Olivier de Schutter (UCL, coordinator), Erik Mathijs (KUL) and Marek Hudon (CERMi–ULB). It will provide funding for one PhD student at CERMi, Hélène Joachain.
